Bill:

Just a note to let you know that I was recently informed that a water leak was discovered in one of the homes we sprayed in the Norfolk, Virginia HOMARAMA this past summer. The estimated time that water had been leaking was around 30 day's. Mold was discovered on the dry wall, and when the builder ripped out the dry wall there was mold on both side's of the dry wall (very heavy on the inside).

To the builder's surprise there was **zero mold growth** on the framing and plywood we sprayed with No-Burn Wood® Gard Mih. Great news for us and big savings for the builder!

Thank You,

Dale Hunter
