<i>Application Method</i>	Airless Sprayer

**Project Background**

Viola Miller, a homeowner in Sugarcreek, Ohio requested to have No-Burn®'s fire retardant and mold resistant products applied to her new home. Her new 4,000 square foot custom built home is in the construction stage. She plans to have all of the new and innovative features built into her new home, including an elevator, and she also plans to protect her home and belongings from the spread of fire and toxic mold growth. She contacted her local No-Burn® Dealer to have them apply No-Burn® Wood Gard Mih to the entire wooden structure of the home.

**Value to Purchaser**

Having a custom home built with all of the best features, Viola plans to have the ultimate protection to proactively protect against the dangers of fire, and also against the growth of black, toxic mold. Viola received a FRCR 2 Rating. This Fire Resistive Class Rating certificate will allow her to pass the information of her home's fire protection to the next homeowners. Viola Miller's new home received a Fire Resistive Class Rating (FRCR) 2, which qualified her to receive discounts on her homeowner's insurance.
