

No-Burn® Teams Up With AEC Daily,
Buffalo, NY, July 25, 2007

- FOR IMMEDIATE RELEASE -

The ability to educate architects, engineers and construction professionals about the benefits of intumescent fire retardant coatings is only thousands of mouse clicks away.

No-Burn® is pleased to announce that after months of preparation, planning and teamwork, its online training course through the AEC Daily Corporation has gone live this week. We welcome you to view information about the course and the AEC Daily Program through the following Web site: www.aecdaily.com, then click “continuing education” and enter “No-Burn®” in the search box.

The title of the course is: ***Intumescent Fire Retardant Coatings: A Proactive Approach to Fire Prevention***

AEC Daily provides access to educational resources, building products information, industry news, discussion forums and much more. The services of AEC Daily are made available to architects, engineers, owners, interior designers, and construction professionals at no charge. Its current and future courses have been designed to meet all state and professional continuing education requirements.

Intumescent fire retardant coatings are gaining a great deal of traction in the construction arena in a wide variety of end-uses, including single family, multifamily and commercial structures. The course available through AEC Daily represents an opportunity to gain knowledge regarding this valuable family of products while, at the same time, receiving continuing education credits.

We welcome you to view the information and course content online at www.aecdaily.com, or to contact us at 800-989-8577x104 if we may answer any questions or provide additional assistance.
