| <i>Product Application</i> | The entire framing structure of three homes ranging from 1,700 to 2,000 sq. ft. |
| <i>Application Method</i> | Airless Sprayer |

Project Background

No-Burn® was introduced to BNR Homes Inc. through a relationship between Midwest No-Burn (certified No-Burn Dealer), K.K.I Design Build (another builder Midwest No-Burn is working with), and BNR Homes Inc., all of which are members of the Local Home Builder's Association. The homes BNR are currently building in the area range from 1,700 to 2,000 sq. ft. Three of the homes in this development have been treated with No-Burn Wood Gard Mih. Wood Gard Mih is a dual-action product that has proven to be effective as a Class A fire retardant and resists the growth of toxic black mold. The first two homes have been sold, with the third home designated as a model home for one year, which will include information on all No-Burn products and the many benefits of each product. Midwest No-Burn will also be conducting a live burn demonstration during the local fall parade of homes. The builder of BNR Homes is planning to offer No-Burn products in all of his custom homes, and would like to incorporate it into his spec homes as well!

Value to Purchaser

BNR Homes is incorporating the use of No-Burn products to differentiate the quality and construction of their homes. No-Burn products show BNR's commitment to buyer and occupant health and safety. Through a relationship between Midwest No-Burn and Home Bank & Trust Co., BNR Homes is able to receive a construction loan discount. BNR's consumers are also able to receive annual mortgage rate reductions and insurance premium discounts. The BNR builder qualified for a 7 Year Builder Mold Warranty on all properties treated with No-Burn Wood Gard Mih.
