Product Selected	No-Burn® Wood Gard Mih
Product Application	Treated all wood framing of home with Wood Gard Mih
Application Method	Airless Sprayer

Project Background	
<p>The Copper Creek Development, located in Amherst, Ohio, is anticipated to be Amherst Township's first Conservation Development. With 20 acres of land, RJ Perritt Homes is building entirely green homes that offer a healthier living environment and have lower operation, utility and maintenance costs. The Home for Hope, one of the 41 homes being built in the Copper Creek Development, is dedicated to support the Ronald McDonald House of Cleveland. With local businesses contributing the innovative products in the home and sponsored by the Northeast Ohio Green Building Initiative, the Home for Hope is constructed entirely of green products. The home's framing was sprayed onsite with No-Burn® Wood Gard Mih, a non-toxic and non-carcinogenic fire retardant and mold resistant coating. This product will enhance the structure's safety and sustainability, helping to improve the indoor air quality with its zero VOC's and resisting the growth of toxic black mold on all treated areas of the home.</p>	

Value to Purchaser	
<p>Copper Creek reflects the Hopes, Innovative Building Materials and Quality showcased in one of Amherst's all green communities. The Home for Hope is constructed with features for green design and fire safety. The home received the second highest Fire Resistance Class Rating through No-Burn®, Inc., qualifying the homeowner for insurance premium savings and the builder for a 7 year mold warranty.</p>	

Other Information	
FRCR Rating Achieved	Fire Resistance Class Rating 2
Programs Applied to the Homeowner	Homeowners Insurance Discounts and Mortgage Rate Reductions
