<i>Product Application</i>	Treated the entire wood framing
<i>Application Method</i>	Airless Sprayer

Project Background

The builder of this Greater San Antonio Parade of Homes attended a burn demonstration hosted by the local No-Burn[®] Dealer in 2005 in order to observe the remarkable benefits of using No-Burn[®] products. Since that time, he has recommended No-Burn[®] to all of his clients. The impression left on these new homeowners was so positive, they decided to have the entire wood framing of their new custom home treated with No-Burn[®] Wood Gard Mih, which provides protection from both fire and mold, allowing them to qualify for discounts on their homeowner's insurance and mortgage premiums.

Value to Purchaser

The builder realizes the amazing performance that the No-Burn[®] products demonstrate against the threat of fire and mold. The positive reactions of his clients and their interest in using No-Burn[®] products in their new homes has prompted him to offer No-Burn[®] as a standard added safety feature in all new homes.

Other Information	
<i>FRCR Rating Achieved</i>	Treated to a Fire Resistance Class Rating of 2
